## LIBRARY CELEBRATION

On the afternoon of May 21st a cocktail- and tea-party was held in the Library to celebrate its rejuvenation. Fellows active in the Academy and friends interested in the Library gathered to inspect the new mezzanine gallery in the Periodicals Rooms, the redecorated reading-rooms and lobby, the installation of adequate lighting, so long desired, the new catalogue-cabinets, and the additional stacks and work-space in the little-used area beyond the auditorium. The Academy's President welcomed the company, and the Director spoke of the generous support of friends and Fellows which had made these improvements possible. Mrs. Harold R. Mixsell manned the tea table with a willing corps of Fellows' wives, while exhibits showed the guests something of the Library's resources and services, their use, variety, and extent.

# FORUM FOR CLINICAL RESEARCH

to be held by

## THE NEW YORK ACADEMY OF MEDICINE

2 EAST 103 STREET

•

NEW YORK 29, N. Y.

---

THE NEW YORK ACADEMY OF MEDICINE will reinstitute the Forum for Clinical Research during the coming academic year 1953-1954. By accepting only a limited number of presentations of new, original and interesting work, the Committee plans to improve the quality of this Forum over that of the Clinical Research meetings of former years. Investigators may present results of original research in clinical medicine at this Forum, to be held Thursday, January 28, 1954, at 8:00 P. M.

This Forum is being arranged by the Committee on Medical Education of the Academy with the following stipulations:—

1. Presentations will be confined to recent original research in clinical medicine, surgery, or to research which is applicable to medicine or surgery in all clinical branches.
2. Presentations should be reports of work done within the last year or of progress in a continuing project. Previous submission to or presentation before a society will not prejudice the opportunity for presentation at the Forum.
3. In submitting application, the investigator is requested to state whether this work has been published, in toto or abstract, or has been submitted for publication; also, in cases where the investigator is working under the head of a department of a hospital or research institute, approval of the head of department is requested.

Presentations will be limited to twelve minutes. A period of free discussion will follow each presentation.

The publication of presentations is not a necessary condition but the Academy plans to publish promptly abstracts of presentations, if the author so desires. In order to expedite publication of abstracts, the Committee requests that the abstract submitted by the investigator be carefully prepared in the form in which publication is desired, with the understanding that publication of the abstract in the *Bulletin* of the Academy shall not preclude publication by the author in any other journal.

The Committee extends an invitation to all research workers of Greater New York to submit *an abstract of proposed presentation in QUADRUPLICATE*, not to exceed five hundred words in length, to the Secretary of the Committee on Medical Education of the Academy during September and October 1953 and not later than November 1, 1953. A formal invitation to participate in this program will then be extended by the Committee to the authors of papers selected for presentation.

ROBERT L. CRAIG, M.D., *Executive Secretary*  
Committee on Medical Education  
The New York Academy of Medicine
